

SKilex

Award winning
Ceiling-mounted video integration system

Optimize your visualization

The SKilex ceiling-mounted video integration system provides the powerful visualization found in hybrid operating rooms, ASCs, OBLs and image-guided interventional suites.

The SKilex 55" 4K, ultra-high definition monitor increases clinical detail and ease of visualization.*

*Shown in photo above: IDI's SKilex video integration system, SIMEON surgical light, IDI's 100-4T G3 Interventional/endovascular table and a typical C-Arm Monitor cart. *When compared to a 27 inch HD monitor.*

INTELLIGENT DESIGN ► TANGIBLE OUTCOMES

SKilex

See what you've been missing!

“Large field monitors have changed my interventional strategy.”

Vascular Surgeon
South Carolina

Benefits

- Create screen layouts otherwise only seen in interventional and hybrid rooms
- See increased clinical detail for greater surgical visualization
- Optimize workflow and viewing ergonomics with a single location for your images
- Easy monitor positioning
- Reduces room clutter
- Simple remote control operation

Our powerful, integrated BIOS system simplifies infrastructure, reduces cost, and can display up to four inputs simultaneously while providing layout options that optimize procedure visualization for the surgeon.

Various screen layouts are easily chosen with a simple hand-held remote-control.

The Skilex ceiling-mounted system simplifies room setup. The robust arm's intuitive and easy brake-release system combined with a long reach provide the flexibility you need to maximize surgeon visualization and comfort.
